

On my drive to Cooke City I saw old slab avalanches in YNP near Mammoth and on Abiathar and Ampitheater among other places. These appeared to have happened earlier in the week. I also saw a more fresh looking persistent slab avalanche on Barronette, 2-3' deep and as wide as its terrain feature, 100-200' Photo: GNFAC

Advisory Region Cooke City Longitude -109.94W Latitude 45.02N

Avalanche Details: Natural Avalanche on Barronette
