

PST on stubborn PWL near Two Top

Date

Mon, 01/06/2025 - 14:15

Activity

Snowmobiling

Very visible buried surface hoar layer was not producing ECT results so we cut a PST and got 30/100end. HS ranged from 105-135cm on leeward slopes and near 60cm on windward.

Region

Out of Advisory Area
