

Unnamed Wall – Hyalite

Date

Thu, 02/13/2025 - 11:00

Activity

Ice Climbing

Climbing at the Unnamed Wall in the vicinity of The Fat One, there are some 3"–8" wind slabs formed. At least three small pockets had released from 2" to 5" deep. Lots of spindrift and heavy winds filled in parts of our trail in a few minutes.

Region

Northern Gallatin

Observer Name

Eric Landmann
