

Very Deep in Cooke City

Date

Mon, 02/17/2025 - 16:10

Activity

Snowboarding

Very deep snow past Round Lake today. New snow ranged from 2-4' deep. My elbows and shouldered were touching the trenches of my sled [track](#) as I rode through Star Lake toward the wilderness boundary. New snow was very low density. No natural avalanches observed and ski cuts were non reactive on test slopes.

Region

Cooke City

Location (from list)

COOKE CITY

Observer Name

Youngbar and Zavora
